Summary

I am 18 years old, a Computer Technician and Artificial Intelligence enthusiast, with experience in Web and Desktop development. I have participated in the creation of management systems and IT support solutions, applying best practices in programming, databases, and the integration of modern technologies.

I have knowledge in React.js, HTML, CSS, JavaScript, PHP, C#, Python, Visual Basic, and MySQL, as well as proficiency in Microsoft 365 and data analysis in Excel. I also developed a personal portfolio with a functional contact form, using the modern technologies I apply in my projects.

I am seeking an opportunity in the technology field to apply my knowledge, expand my skills, and contribute to challenging projects. I have strong communication skills, am proactive, collaborative, and work well in teams — qualities that allow me to add value in dynamic and innovative environments.

Education

- **High School Diploma** – Colégio João Paulo I, Bangu, Rio de Janeiro
- **Technical Degree in Informatics** – Colégio João Paulo I, Bangu, Rio de Janeiro
- **Bachelor's in Systems Analysis and Development** – Universidade Veiga de Almeida (UVA), starting February 2026

Languages

- Portuguese – Native
- English – Intermediate

Professional Experience

IT Department – Colégio de Aplicação Ferreira de Almeida *Jan 2026 – Present*

- Customer support and technical assistance
- School system management
- Data analysis
- Preventive computer maintenance

Internship in Informatics – Colégio João Paulo I *Apr 2025 – Sep 2025*

- Data analysis in Excel
- Preventive, corrective, and evolutionary computer maintenance
- Technical Support

Sports Management System Development – Colégio João Paulo I *Apr 2025 – Present*

- System for managing academic competitions
- Event seat reservation module

Academic Management System Development – Ingrid Soutinho Dance Studio *Oct 2025 – Present*

- Complete system for student, class, and modality registration
- Enrollment and tuition control
- Automatic billing and reporting

Technical Skills

- **Programming:** React.js, C#, PHP, Python, JavaScript, HTML5, CSS3
- **Databases:** MySQL (modeling, queries, integration)
- **Tools:** Git, Microsoft 365
- **Systems:** Development of school and business management systems
- **IT:** Preventive and corrective computer maintenance
- **Multimedia:** Video editing and digital design

Soft Skills

- Proactivity and initiative
- Strong interpersonal communication
- Teamwork and collaboration
- Organization and results-oriented focus
- Fast learner
- Positive relationships with colleagues and clients

Projects

Personal Portfolio (React.js + HTML + CSS + JS)

- Personal Portfolio
- Form for direct contact via e-mail

School Management System – Colégio João Paulo I (C# + MySQL)

- Authentication with access levels
- Score registration and management
- Automated reports with intuitive interface

Academic System – Ingrid Soutinho Dance Studio (C# + MySQL)

- Student, class, and modality registration
- Enrollment and tuition control
- Seat reservation management
- Full CRUD and discount calculations

School Management System – Colégio João Paulo I (PHP + HTML + CSS + JS + MySQL)

- Authentication with multiple profiles
- Registration, queries, and reporting
- Event seat reservation module

Courses

- **Information Management** – Sie EdTech (40h, focus on data analysis and organization)
- **Python** – Santander Open Academy
- **Coletivo Online** – Coca-Cola
- **Artificial Intelligence** – Simplifica Training
