PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer and certified IT Technician with proven expertise in building scalable Web applications (React, TypeScript, PHP), multi-tenant SaaS platforms with conversational automation, and high-performance desktop solutions (C#, .NET, MySQL). Proven track record developing corporate ERP platforms, automated WhatsApp triage bots, and AI-assisted financial management platforms integrated with payment gateways (Mercado Pago). Passionate about clean code, robust database architecture (PostgreSQL/MySQL), responsive UX, and delivering real business value.

TECHNICAL SKILLS

Frontend & Web:	React, TypeScript, JavaScript (ES6+), Semantic HTML5, Modern CSS3, Vite, Framer Motion, Responsive UI/UX
Backend & Desktop:	C# (.NET), PHP, Python, REST APIs, JWT / RBAC Authentication, High-volume CRUDs, Software Architecture
Databases:	PostgreSQL, MySQL (Relational schema design, complex query optimization, indexing, transaction integrity)
Integrations & Automation:	Payment Gateways (Mercado Pago / Webhooks), WhatsApp Multi-agent Bots (QR Code sessioning), Applied AI
Tools & DevOps:	Git, GitHub, VS Code, Visual Studio, Microsoft 365, Advanced Excel Modeling, Lovable

PROFESSIONAL EXPERIENCE

Software Developer & Corporate IT Support Specialist — Colégio de Aplicação Ferreira de Almeida (CAFA) Jan 2026 – Present

- Maintain and administer mission-critical academic and student management platforms across the institution.
- Architected and developed internal C# desktop tools with real-time MySQL database queries to automate enrollment workflows and track enrollment targets for administrative personnel.
- Provide technical support and troubleshooting for administration, executive leadership, teachers, and staff.
- Administer and support physical security hardware, network peripherals, and facial-recognition turnstile access systems.
- Perform data extraction and structured analysis to optimize administrative procedures and support strategic decisions.

Webmaster & Institutional Web Platform Lead — Colégio de Aplicação Ferreira de Almeida (CAFA) May 2026 – Present

- Direct web hosting management, DNS records, SSL certification, server reliability, and site security.
- Continually enhance web user experience (UX/UI), page performance, and mobile accessibility standards.
- Implement search engine optimization (SEO) best practices and maintain real-time announcements and institutional portals.

Information Technology Intern — Colégio João Paulo I Apr 2025 – Sep 2025

- Delivered tier-1 and tier-2 IT support for hardware, workstation operating systems, and networked software.
- Processed institutional datasets and generated analytical spreadsheets using advanced Microsoft Excel functions.
- Executed preventive and corrective maintenance on local workstation fleets and network equipment.

FEATURED PROJECTS & PRODUCTION SYSTEMS

NextFlowChat – Multi-Tenant WhatsApp Automation & Support SaaS

nextflow.leenicorporation.com.br

`TypeScript • PostgreSQL • SaaS`

- Engineered a multi-tenant SaaS automation platform built with TypeScript and PostgreSQL ensuring strict tenant isolation.
- Features QR Code-based instance pairing, visual workflow builder for automated messages, and contact management.
- Includes context-aware bot triage with seamless, real-time handoff to human support queues.

NextFinances – AI-Powered Subscription Financial Management SaaS

nextfinances.leenicorporation.com.br

`TypeScript • PostgreSQL • AI • Mercado Pago`

- Designed a personal and corporate financial intelligence SaaS offering automated cash flow projections and AI insights.
- Integrated end-to-end Mercado Pago APIs for subscription management (monthly/annual recurring billing) and webhooks.
- Interactive dashboards for revenue tracking, budget categorization, and financial goal setting with resilient security.

Acompanha Matrículas – Desktop Educational Enrollment Management

`C# • .NET • MySQL • Desktop` Colégio CAFA

- High-throughput desktop solution engineered in C# to expedite school admissions and re-enrollment management.
- Connects directly to enterprise MySQL database executing indexed queries to extract real-time admissions statistics.
- Tailored productivity interface featuring advanced filtering, target comparisons, and report exports.

NextHelp – Corporate Helpdesk & Ticket Management System

`Web • Lovable • RBAC` nexthelp.lovable.app

- Centralized web ticketing platform featuring granular role-based access control (Admin, Agent, Requestor).
- Tracks ticket lifecycles from open to resolution with unique case IDs, internal notes, and SLA compliance monitoring.

Academic & Financial Management Platform

`PHP • MySQL • JavaScript • Client Portal` Studio Ingrid Soutinho

- Comprehensive ERP managing students, instructors, recurring tuition, ticketing, and event seating reservations.
- Parent Portal allowing real-time tuition viewing and online payments.
- Successfully migrated legacy C# desktop architecture into an accessible, responsive web application.

CAFA Emp – Real-Time Event Scoring & Leaderboard System

`PHP • MySQL • JavaScript` Colégio CAFA

- Web platform for large-scale institutional fairs, enabling judges to input scores via mobile interfaces in real time.
- Live scoring calculation and automatic standings generator with zero latency and high integrity.

EDUCATION

B.Sc. in Systems Analysis & Development
Veiga de Almeida University (UVA)
Feb 2026 – Present (In Progress)

IT Technician Diploma
Colégio João Paulo I
Completed • Certified Technical Degree

High School Diploma
Colégio João Paulo I
Completed

CERTIFICATIONS & TRAINING

- **Santander Bootcamp 2026** – Digital Innovation One (DIO)
- **Information Management** (40h) – Sie EdTech
- **Python Programming** – Santander Open Academy
- **Applied Artificial Intelligence** – Simplifica Treinamentos
- **Professional Development** – Coca-Cola Coletivo Online

LANGUAGES & CORE STRENGTHS

- **Portuguese:** Native
- **English:** Intermediate (Technical reading, documentation & communication)
- **Key Strengths:** Fast learner, product mindset, clear communication, and high adaptability.
